

Visitor Environmental Charter

or how to be more sustainable when visiting Ryedale

We understand that by making positive changes we can all reduce our effect on the environment. As a visitor we welcome your support in assisting us to become a more sustainable destination.

Save Energy

Please help us to reduce energy consumption by switching off lights and unplugging devices that are not being used. Familiarise yourself with heating controls and turn down the thermostat or switch off the heating when you go out and overnight.

Eat Local, Buy Local and See Local

We always try and encourage our guests to choose local products and services to experience the true flavour of what Ryedale has to offer.

Give Cars and Taxis a Rest

Avoid using the car, if only for the day. Check out options for countryside walks which start directly from your holiday accommodation.

Check out and use public transport or options for cycle hire in the area.

Respect Nature

Use footpaths and cycleways responsibly.

Help us to look after the area and its wildlife by not littering.

Be Water Wise

Please use water wisely by:

Making sure you turn taps off fully – please tell us about any dripping taps or leaks.

Filling the kettle only with the amount of water you need.

Reduce, Reuse, Recycle

Avoid over packaged goods and say no to carrier bags.

Support “Refill Ryedale” by taking a water bottle and reusable coffee cup when you go out for the day.

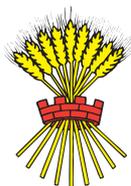

Many businesses in Ryedale will happily refill your water bottle.

Look out for the window stickers or download the Refill app to locate them. Or just ask!

Thank you for doing your bit to protect the environment!
